Executive Profile

Senior UI/UX Designer with over 10 years of experience shaping customer-centered digital products across technology, financial services, telecommunications, and FMCG. Experienced across the complete design lifecycle, including discovery, research, experience strategy, information architecture, interaction design, prototyping, usability testing, and delivery. Brings mature design judgement, strong stakeholder communication, and the ability to translate complex customer, business, and technical requirements into clear, accessible, and scalable experiences.

Core Competencies

Strategy and Discovery

- UX strategy • Product discovery • Problem framing • User research
- Stakeholder workshops • Customer journey mapping • Requirements analysis

Experience and Interface Design

- Information architecture • User flows • Interaction design • Wireframing
- High-fidelity UI design • Responsive web and mobile design • Interactive prototyping

Validation and Delivery

- Usability testing • Accessibility and inclusive design • Design systems • Design reviews
- Developer handoff • Agile collaboration • Experience quality assurance

Work Experience

Senior UI/UX Designer

Mar 2025 – Present

Amazon

- Contribute senior product-design expertise within a global technology and e-commerce organization, guiding customer-focused experiences from discovery through delivery.
- Led end-to-end design activities across product discovery, problem definition, concept development, validation, detailed design, and implementation support.
- Partner with product managers, engineers, researchers, and business stakeholders to understand customer needs, define requirements, and agree on product priorities.
- Translate complex workflows, operational considerations, and technical constraints into intuitive user journeys, task flows, and interaction models.
- Create wireframes, high-fidelity interface designs, and interactive prototypes that communicate intended behaviors, content hierarchy, and responsive states.
- Use qualitative research, usability findings, customer feedback, and available product data to guide decisions and identify experience-improvement opportunities.

- Plan and support design validation, turning findings into prioritized recommendations that balance customer value, feasibility, and business objectives.
- Contribute to scalable design systems and reusable interaction patterns, improving consistency, accessibility, and delivery efficiency across products.

UI/UX Design Specialist

Nov 2023 – Feb 2025

Aviva

- Worked with product owners, business analysts, developers, and compliance stakeholders to translate requirements into coherent customer journeys and interfaces.
- Mapped current and future-state journeys, task flows, and information structures to clarify user needs and expose friction within complex processes.
- Produced wireframes and interactive prototypes at appropriate levels of fidelity to support early discussion, validation, and delivery.
- Applied research insights, customer feedback and usability findings to improve comprehension, navigation and task completion across financial-service journeys.
- Considered accessibility and inclusive-design principles throughout the design process, supporting experiences for customers with varied needs and contexts.

UI/UX Design Specialist

Apr 2017 – Aug 2022

Nigerian Bottling Company, Nigeria

- Designed digital products and internal platforms within a large FMCG organization, converting operational and business requirements into usable experiences.
- Translated complex operational processes into clear workflows, user journeys, information structures, wireframes and prototypes.
- Created responsive interface designs that supported clarity, consistency and ease of use across devices and user groups.
- Used feedback from users and stakeholders to identify usability issues, refine proposed solutions and guide product improvements.

UI/UX Design Specialist

Dec 2013 – Mar 2017

MTN Nigeria, Nigeria

- Designed web and mobile experiences for customers and internal users within a fast-paced telecommunications environment.
- Gathered and interpreted user, business, and technical requirements to define appropriate experience-design solutions.
- Created information architecture, user flows, wireframes, interface designs and prototypes for digital-service journeys.
- Participated in research, feedback analysis and usability evaluation to identify friction and improvement opportunities.

Education

- Master of Science 2022 – 2023
Leeds Beckett University, Leeds, United Kingdom
- Bachelor of Science 2006 – 2011
Ladoke Akintola University of Technology, Nigeria

Professional Training

UI/UX Design Academy Program

Sep 2012 – Nov 2013

Clarion College of Business and Technology

One year of focused training covering user-centered design, research and requirements analysis, information architecture, interaction design, wireframing, prototyping, interface design, usability evaluation, design thinking, and practical portfolio development.

Design Tools

Figma, FigJam, Adobe XD, Sketch, Miro, Axure RP, Balsamiq, Framer, ProtoPie, Maze, Dovetail, Adobe Photoshop, Adobe Illustrator, Jira, and Confluence.
